

Materials & Maintenance

table tops

Fenix NTM is a table top finish in the form of a thin laminate that is pressed to the bottom and top of the mdf. The sides of the mdf are lacquered. Fenix is a durable material that does not show fingerprints. It can be cleaned using a damp soft cloth soaked in warm water or a solution of water and mild detergent. We recommend the use of the Fenix maintenance kit (contact your nearest salon or the dealer where you purchased the product). Damages such as scratches that are not cut in can be treated thermally using an iron and a damp cloth.

TRESPA HPL

Trespa Meteon outdoor table tops have a very compressed surface, virtually pore-free, making them very impervious to contamination. This is why Trespa Meteon® is highly resistant to most chemicals, including many non-aggressive and aggressive cleaning agents. Do not use abrasive or polishing cleaners. Use only clean sponges and soft cloths. Algae and mould will not enter the pores of the material so they are easy to clean just like dust, stains or fingerprints. You can wash them off using a universal household cleaner. Rinse and wipe the board using a soft cloth to avoid any traces remaining after washing. All colours have a black core, visible on the side.

GLASS

The glass surfaces can be cleaned with a well-drained soft cloth soaked in a mixture of alcohol and water or glass cleaner. Wipe the surface with a dry, lint-free cloth. Avoid products containing acetone, ammonia, chlorine, and solvents, abrasives, and furniture wax.
