

Materials & Maintenance

table tops

Fenix NTM is a table top finish in the form of a thin laminate that is pressed to the bottom and top of the mdf. The sides of the mdf are lacquered. Fenix is a durable material that does not show fingerprints. It can be cleaned using a damp soft cloth soaked in warm water or a solution of water and mild detergent. We recommend the use of the Fenix maintenance kit (contact your nearest salon or the dealer where you purchased the product). Damages such as scratches that are not cut in can be treated thermally using an iron and a damp cloth.

TRESPA HPL

Trespa Meteon outdoor table tops have a compressed surface, virtually pore-free, making them impervious to contamination. This is why Trespa Meteon® is highly resistant to most chemicals, including many non-aggressive and aggressive cleaning agents.

Do not use abrasive or polishing cleaners. Use only clean sponges and soft cloths. Algae and mould will not penetrate the pores of the material so they are easy to clean just like dust, stains or fingerprints. You can wash them off using a universal household cleaner. Rinse and wipe the board using a soft cloth to avoid any traces remaining after washing.

GLASS

Glass surfaces can be cleaned with a well-drained soft cloth soaked in a mixture of alcohol and water or glass cleaner. Wipe the surface with a dry, lint-free cloth. Avoid products containing acetone, ammonia, chlorine, and solvents, abrasives, and furniture wax.

Materials & Maintenance

table tops

The quartz tops are made from a mixture of quartz sand or pure quartz, structural polyester resin and color pigments that are stabilized by UV rays. The resin creates flexibility, and the top-making process is strictly controlled and involves compressing the mixture by vibration within vacuum, making the top extremely resistant to mechanical and chemical impacts. The quartz composite top has a shiny, non-porous and very durable work surface that will retain its quality for decades with the same beauty, appearance and impression of natural stone. This non-toxic and environmentally friendly product is resistant to stains from most liquids, it is not porous and it is resistant to heat, acids and impacts, and it is not flammable. To maintain and clean the quartz surfaces, it is enough to use soap and warm water, and a soft microfiber cloth.

COMPACT BOARDS

Compact boards are high-pressure thermoset laminates (HPL) obtained by pressing under high pressure and high temperature. Refined with decor on both sides, this multi-layer material is at the same time extremely resistant and long-lasting as well as easy to maintain. It also provides high resistance to scratches, wear, solvents, chemicals, moisture and heat. The surface of Compact boards is extremely resistant to dirt, but if necessary it can be treated with standard non-abrasive cleaners.
