

Materials & Maintenance

metal

All powder coated metal products and elements have a matte finish, which is Prostoria's visual standard used in the processing and protection of metallic materials.

Hand-welded metal parts may have minor imperfections that do not affect the quality or function of the product, but are a reflection of the manual work of our craftsmen.

Metal products intended for outdoor use have a double finish - primer for better mechanical resistance and a coloured coating that provides protection from corrosion.

To clean powder coated metal products, use a damp soft cloth soaked in a solution of water and a pH neutral detergent, and wipe with a clean, dry, soft cloth.
