

# Bavul collection

PRODUCT SHEET

# Bavul collection

by **LEA AVIANI**

**Bavul** is a multifunctional upholstered object that transforms from a bench to a bed. Its shape and a name are a reminiscence of a Dalmatian antique chest that was used for storage, seating or travel, and it was handed over as a legacy inside the family. Bavul in its basic form serves as a seating system in a living room, dining room at a table, or in a hallway – waiting to welcome your needs for the additional bed. Its dimensions are also perfect match for the hos-

pitality projects where it saves the precious space. With strong visual appearance and color combinations, Bavul blends in various interior styles.
