

DESIGN: NUMEN / FOR USE

Osmo chair is developed on the classic typology of chairs for terraces of hotels and restaurants along the Adriatic coast. The steel structure combined with wooden seat and backrest provides an optimal equilibrium of comfort and rigidity required in demanding context of extensive use in exterior exposed to sun and seawater. A bent tube structure of expressive geometry defines the frame in which the seat and backrest made of wooden slates are inserted into. The characteristic inclination of front legs combined with extremely wide, fractured armrest, results in a biomorph appearance of insectoid robot from SF movies.

SEAT & BACKREST	solid wood / metal
FINISH	high quality oil / acrylic lacquer
FRAME	metal tube Ø 16 mm
FINISH	powder coated matt / galvanised
