

DESIGN: SIMON MORASI PIPERČIĆ

To match the chair, Simon Morasi Piperčić designed a table with rhomboid shaped legs. They are positioned diagonally in the direction of the corners of the table. Looked from the corner two legs are very thin and other two wide, which gives a table and interesting dynamic look. Table top has a lens like form and sharp knife edge, which makes it very elegant. Especially when the table is made in lacquered finish with Fenix NTM top.

STRUCTURE	solid wood
FINISH	solid wood / MDF + fenix NTM
FINISH	high quality oil / acrylic lacquer
